Dear Mr. Weaver:

This regards your January 23, 2017 letter, seeking an appeal of the final U.S. Geological Survey (USGS) response to Envalue Engineering's request for correction of information (dated January 4, 2017), submitted under the USGS Information Quality Guidelines. Related documentation may be viewed on our Web page at https://www2.usgs.gov/info_qual/1972_PA_streamflow_data.html.

This letter is to inform that we will need additional time beyond the 90 calendar days indicated in our July 20 letter for obtaining Department of the Interior and Office of Management and Budget review of the USGS appeal response. We anticipate sending the final USGS decision on your appeal within the next 90 days. We will let you know if additional time beyond this is needed.

Thank you for your continued patience.

Sincerely,

Craig R. Robinson
Director
USGS Office of Science Quality and Integrity
