Dear Mr. Weaver:

This relates to the February 10, 2016, Request for Correction of Information submitted under the U.S. Geological Survey (USGS) Information Quality Guidelines. The request regarded Web site information on Peak Streamflow for Pennsylvania, [USGS 01576500 Conestoga River at Lancaster, PA](#) (Water Year 1972). Documentation about the request may be viewed on our Web page at http://www2.usgs.gov/info_qual/1972_PA_streamflow_data.html.

This letter is to inform that the USGS will need to further extend the time for responding to your request than was indicated in our August 10 letter. We are preparing the draft response for Department of the Interior review. We anticipate sending you a final response within the next 90 days but will let you know if additional time beyond this is needed.

Thank you. We appreciate your patience.

Sincerely,

Randall C. Orndorff
Acting Director
USGS Office of Science Quality and Integrity
