

Reminder: Upcoming Changes to Landsat Pre-Collection Inventory

Effective April 30, 2017, newly-acquired Landsat 7 ETM+ and Landsat 8 OLI/TIRS scenes will be processed into the Landsat Collection 1 inventory structure only; **Landsat Pre-Collection inventory will no longer be populated with newly-acquired data.**

Users are strongly encouraged to download Landsat Collection 1 data (<https://landsat.usgs.gov/landsat-collections>), as the Landsat Pre-Collection inventory will eventually be removed from EarthExplorer (<https://earthexplorer.usgs.gov>). The discontinuation of Landsat Pre-Collection inventory availability will be communicated to the Landsat user community once a date has been determined.

Please contact USGS User Services (custserv@usgs.gov) with any questions about this change.
